

Can you spot the \$1,200 door in this picture?

It's the one next to the \$439 carbon copy.

Introducing the PEASE
CARBON DOOR System.

It looks like wood and
outperforms it in every way.

It looks like
hardwood doors
could be falling
on hard times.

That's because

Pease has developed a new
line of carbon doors that have all the beauty of real hard-
wood at a much more attractive price. Plus, the Pease
Carbon Door is a technological marvel. Its dent-resistant,

carbon fiber skin significantly reduces thermal bowing.

And with Pease staining kits, the stain applies faster
and gives the gorgeous appearance of
real wood. So, still can't tell which
door is real wood and which one's

the carbon copy? Then maybe you should
call us at 1-800-88-DOORS or
stop by your nearest Pease
Dealer and find out in person.
